

`std::enable_shared
_from_this< BNode >`

`Tree< T >::Node`

`BTree< T >::BNode`

```
graph BT; BNode[BTree< T >::BNode] --> Shared[std::enable_shared_from_this< BNode >]; BNode --> Node[Tree< T >::Node];
```

The diagram illustrates the relationship between three C++ classes. At the bottom is a box for `BTree< T >::BNode`. Two blue arrows originate from this box: one points to a box for `std::enable_shared_from_this< BNode >` at the top left, and the other points to a box for `Tree< T >::Node` at the top right. This indicates that `BTree< T >::BNode` inherits from both `std::enable_shared_from_this< BNode >` and `Tree< T >::Node`.
